1 INTRODUCTION

The NTA are responsible for the performance management of drug treatment services in England. The framework within which this treatment is commissioned and provided is documented in Models of Care, 2006 and NTA Guidance on Commissioning of Young People's Specialist Substance Misuse Treatment Services (forthcoming). This document establishes the Reference Data in use within NTA in support of this objective – for example, in supporting relevant computer systems.

Reference data is defined as (relatively) static data. Generally, it is employed as a means of validating data entry, and will typically be used to control the contents of drop-down lists etc.

All reference data items are applicable to Young People and Adults unless specified otherwise.

This document is intended to be a definitive and accessible source for use, primarily by NTA personnel. It is not intended to be read from end to end, rather as a reference document, which is utilised by a variety of readerships, including:

- Interpreters of data provided from NTA systems
- Suppliers of systems to NTA
- Suppliers of systems which interface to NTA-systems
- NTA/NDTMS personnel.

2 CHANGE CONTROL

As this document is the ultimate definition for NDTMS reference data, three consequences follow:

- The behaviour of the NDTMS system must strictly adhere to the latest approved version of this document.
- Only the latest approved version of this document has any significance.
- Approval of new versions of this document can only be made by the person who is performing the role of NDTMS Programme Manager.

For internal data, the details contained in this document are the master definitions of such data, extending to issues such as upper/lower case, hyphenation, punctuation etc.

For external data, this document defines the owner of the master data, and any timing details of when changes in such external data are adopted by NDTMS.

For example, the Office for National Statistics (ONS) may up-issue the Ethnicity Codes, but it may not suit the NTA if these new values were to be suddenly and uncontrollably adopted by the NTA, and so the NDTMS Programme Manager needs to control the timing of when this new version of the Ethnicity Codes were to be introduced.

4 DETAILS OF DATA TYPES

4.1 Sex Codes

The permissible settings are as follows:

Code	Text	Comments	Sort Order
M	Male		1
F	Female		2

4.2 Ethnicity Codes

The permissible settings are as follows:

Code	Text	Comments	Sort Order
A	White	White British	1
B	White	White Irish	2
C	White	Other white	3
D	Mixed	White and Black Caribbean	4
E	Mixed	White and Black African	5
F	Mixed	White and Asian	6
G	Mixed	Other mixed	7
H	Asian/Asian British	Indian	8
J	Asian/Asian British	Pakistani	9
K	Asian/Asian British	Bangladeshi	10
L	Asian/Asian British	Other Asian	11
M	Black/Black British	Caribbean	12
N	Black/Black British	African	13
P	Black/Black British	Other Black	14
R	Other Ethnic	Chinese	15
S	Other Ethnic	Other	90
Z		Not stated	99

Group is given above for contextual purposes only – it is not owned/used by NDTMS. Further details of ethnicity groupings are given on the ONS website at:

http://www.statistics.gov.uk/about/ethnic_group_statistics/

4.3 Nationality codes:

Country of nationality, code selected from ISO 3166-1 alpha-3 standard.

ISO 3166 Country Codes

http://en.wikipedia.org/wiki/ISO_3166-1_alpha-3

4.4 Agency codes:

Each treatment provider is assigned an Agency Code. Responsibility for allocating a code is the responsibility of the relevant Regional Database Manager.

A general guideline is that the code should comprise of two parts:

- A single letter which is intended to indicate the NTA Region which 'manages' that agency – see above
- An identifier (one to six alphanumeric characters) which uniquely identifies that treatment provider, within the region.

This guideline will ensure uniqueness of the Agency code on a national basis.

As at Sept 2004, two regions had exceptions to this convention:

- East Midlands region has a small number of agencies beginning with P (i.e. the South East code) – these were originally part of the South East region, but which were later 'moved' due to a boundary re-arrangement.
- North West region's usage of agency codes has an idiosyncrasy - the character 'M' is used for Merseyside agencies.

As the scope of treatment providers included in NDTMS increased (e.g. inclusion of EMIS GPs), it is envisaged that additional coding strategies for Agency codes will be adopted – where these strategies fall outside the general guideline, the NTA Region will need to liaise with NTA to ensure that agency codes are not duplicated on a national basis.

Examples of agency codes include L43, W1019 and UAR1.

Treatment providers have been deemed too volatile to be included in this document - for the current definitive list of agency codes in a region, please refer to the relevant Regional Database Manager. Snapshots of the agency lists are also given on the relevant regional pages on the NTA website.

4.5 Consent for NDTMS?

The permissible settings are as follows:

Code	Text	Comments	Sort Order
N	No		2
Y	Yes		1

4.6 Previously treated?

The permissible settings are as follows:

Code	Text	Comments	Sort Order
N	No		1
Y	Yes		2

4.7 Post Code mappings

Post code mappings are used to establish/validate the NHS organisational area (e.g. PCT) in which a client is resident. This information is mastered by NHSIA [4].

4.8 Accommodation Need codes

There are two sets of accommodation needs – depending if the treatment provider provides services to:

- Adults
- Young People

The set of accommodation needs to be used by a specific treatment provider should be agreed with the regional database manager.

Adult Services

4.22 Drug Action Teams (DATs)

The list of Drug Action Teams and their codes are published by the Home Office (HO), on the following website <http://www.drugs.gov.uk/dat/directory/?view=Standard>. Contact details for the DAT co-ordinators are also accessible from that site.

A list of the Partnership and DAT Codes currently used on NDTMS (is given in APPENDIX B - and APPENDIX C - .

4.23 Drug list (Problem Substance No1, No2, No3)

This is controlled by the NTA. Details (groups, names and codes) are given in Appendix E.

Two items in this list (Drug-Free and Alcohol-Free) are no longer actively used by NDTMS, and their use in the NTA Extracts should be discontinued for clients presenting after 1st April 2006. These values will remain in the table, but 'struck through' to indicate that they are no longer to be used for new presentations.

4.59 NHS organisational areas (SHAs and PCTs)

A list of those currently implemented in NDTMS is given in Appendix B. This shows the structure of, and relationship between the following:

- Region
- Strategic Health Authority (SHA)
- Primary Care Trust (PCT).

Additionally, this table also shows for each PCT, the Partnership for which they should receive any reports which are only published at Partnership level.

This table should NOT be used to attempt to map PCTs to Partnerships - PCT boundaries and Partnership boundaries often have little in common, so that one PCT may physically straddle three Partnerships.

The list of PCTs in the UK is also accessible from the following URL:

<https://www.nhs.uk/aboutnhs/HowtheNHSworks/Pages/NHSstructure.aspx>

For Scotland, Community Health Partnership's (CHP) are the equivalent of PCTs – [7]

Additionally APPENDIX C - lists the PCTs and Partnerships for Scotland, Wales, Northern Ireland, Isle of Man and the codes for Outside UK.

4.60 Mental Health Trusts

A list of trusts which provide mental health services is given in APPENDIX E - .

Accordingly, this list is not restricted to just those trusts which are entitled 'Mental Health Trusts', as some other NHS Trusts include mental health in the services they provide.

The list of Mental Health Trusts is also accessible from the following URL:

<https://www.nhs.uk/servicedirectorios/Pages/MentalHealthTrustListing.aspx>

4.61 Treatment provider types

Each treatment provider is assigned one (and only one) of the following 'type' designations:

Code	Type	Comments	Sort Order
1	GP		3
2	Inpatient		1
3	Outpatient		2

4.62 Region codes

Each region has been assigned two different identifiers:

- A single character code
- A two character code

These identifiers are used in various different NDTMS scenarios – but in any one scenario, only one is relevant, and they are never mixed.

APPENDIX G - PROCESS TO REQUEST A COPY OF THE NATIONAL ADMINISTRATIVE CODES SERVICE (NACS) CD

To request a copy of the NACS CD, write to NACS on company headed paper stating who you are, what data you require and what you are going to be using the data for. If approved, NACS will then send you a license agreement which you must sign and return to NACS. You will then receive the CD every quarter.

The reason for this, is due to license agreements with other third party organisations that supply some of the data to NACS such as the GP and practice data that is supplied by the PPD and the NHS postcode directory which is supplied by the ONS.

You should write to NACS at:
